Nothing is more discouraging than to have an unhealthy sore or ulcer resist one treatment after another, sometimes scabbing over and apparently getting well, then returning with renewed energy and becoming

worse than before. Sores and ulcers are not due to outside causes; if they were, salves, plasters, lotions, etc., would cure them. They are kept up by a diseased and polluted condition of the blood brought on by the absorption of refuse and waste matters of the body into this vital fluid. These accoumulations find their way into the blood, usually because of an inactive and sluggish condition of the system. Nature intends that they shall be carried off through the usual channels of waste, but the different members failing to perform their duties properly leave the matter to sour and ferment. The blood then, in its effort to keep the system healthy, absorbs these poisons and at the first bruise, cut or wound the sore is formed, and the constant drainage of foul matter through it keeps the place open and irritated so it cannot heal. Another cause for old sores and ulcers is the polluting or weakening of

the blood from the remains of some constitutional trouble or the effects of a long spell of sickness. S. S. begins at the foun-tain-head and drives out all poisonous mat-PURELY VEGETABLE, ter and germs, and makes a lasting cure. As soon as the system gets under the nfluence of S. S. S. the inflammation gradually leaves, the flesh takes on

a healthy color, and soon the place is permanently healed. Book on sores and ulcers and any medical advice without charge. THE SWIFT SPECIFIC CO., ATLANTA, GA.
